Social Impact Report 2024

World Economic Forum (WEF) metrics

Opening Statement

PwC Ireland's report on progression against the World Economic Forum (WEF) **Stakeholder Metrics** is a new initiative, which builds on our commitment to trust and transparency.

Globally, PwC collaborated with the WEF to identify a universal set of environmental, social, and corporate governance (ESG) metrics and disclosures that entities can use to align their mainstream reporting on performance against ESG indicators. These metrics also support entities to track their contributions towards the Sustainable Development Goals on a consistent basis.

Data and disclosures in this report relate to PwC Ireland's business operations for the year 1 January 2024 to 31 December 2024, unless otherwise specified. These metrics are used to measure our progress to date and ensure we remain aligned with our transparency commitments.

The report can be read in conjunction with the PwC Ireland Transparency Report, which has been published annually for over a decade.

PwC Ireland refers to the eight Irish general partnerships formed under the Partnership Act 1890 and, as of 1 July 2024, PricewaterhouseCoopers (Northern Ireland) LLP. PwC Global is used to refer to the network of firms of PricewaterhouseCoopers International Limited.

Basis of preparation description

The PwC Ireland employee gender profile is based on self-disclosed gender information as of 31 December 2024. This number includes all permanent, fixed-term, and casual employees.

We recognise that gender is non-binary. Employees have the option to specify their gender identity (as distinct from gender profile) within our central human resources portal. However, currently the number of gender identity responses is too low for us to report. We will continue our focus on increasing the percentage of people who disclose this information to assist us with our internal inclusion and diversity efforts and the quality of our reporting.

Greenhouse gas (GHG) emissions

For all relevant greenhouse gases (e.g. carbon dioxide, methane, nitrous oxide, F-gases etc.), report in metric tonnes of carbon dioxide equivalent (tCO2e) GHG Protocol Scope 1 and Scope 2 emissions. Estimate and report material upstream and downstream (GHG Protocol Scope 3) emissions where appropriate.

PwC Ireland disclosers

Scope 1, 2, and 3 business travel emissions (tCO2e)

Scope 1

- FY19 441 (Baseline)
- FY20 401
- FY21 370
- FY22 380
- FY23 376
- FY24 402

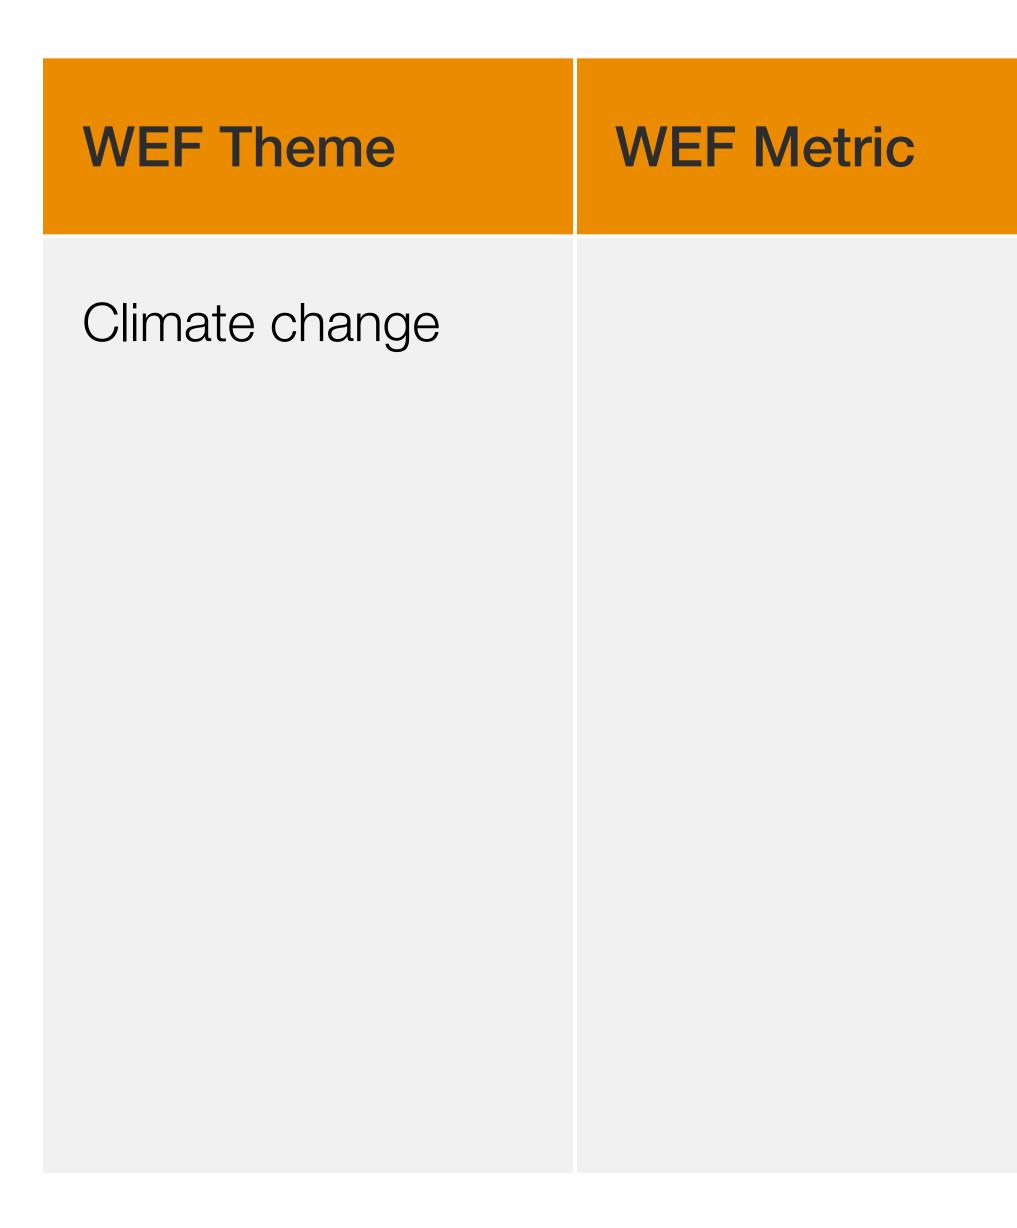

Basis of preparation description

PwC Ireland's GHG emissions data is monitored and measured in line with best practice reporting principles, which are aligned with the Greenhouse Gas Protocol's Corporate Accounting and Reporting Standard, revised edition ("GHG Protocol").

Globally, PwC has adopted the calculation-based quantification methodology to estimate emissions, as appropriate emission factor guidelines have been released by authoritative sources covering PwC's reported activities. Further information on methodology and emission factors is available in the FY24 PwC Global Environment Report. Activity data is collected from key internal and external data sources, including invoices, reports provided by suppliers (e.g., building managers and travel suppliers), and internally generated consumption reports (e.g., expense claims). Primary data is used to calculate emissions. Where primary data is not available, estimates are used based on extrapolation of available data, proxy data, and local statistical data benchmarks.

Scope 1 emissions Includes: Stationary combustion of fuel in all PwC Ireland office locations, including diesel for backup generators and natural gas in commercial kitchens in Dublin (kilowatt hours of energy consumed per office location).

Social Impact Report 2024

Scope 3

FY19 - 5215 (Baseline) FY20 - 3536 FY21 - 60 FY22 - 1167 FY23 - 2795 FY24 - 2832

Basis of preparation description

Scope 2 emissions (market based) Includes: Purchased electricity (kilowatt hours of electricity consumed per office location) Our Scope 2 emissions, including renewables consumption, are prepared in accordance with the GHG Protocol Scope 2 Guidance and RE100 technical criteria. We report on our Scope 2 emissions using the market-based approach, which has been designed to better reflect electricity purchasing decisions, including accounting for the impact of green or renewable electricity products on GHG emissions. The market-based approach involves using a product-specific emissions factor wherever it is available and then applying the relevant "residual mix" emissions factor to any electricity that does not have product-specific emissions information.

Scope 3 emissions: Includes: Business travel: • Air travel (passenger kilometres travelled by cabin class and haul) • Land travel (kilometres travelled in taxi, train, and car by fuel type) • Overnight accommodation (number of nights in domestic and international accommodation).

3. Discussion of initiatives and stakeholder engagement to improve the broader operating environment and culture, in order to combat corruption.

PwC Ireland disclosers

Approach to combatting anti-corruption 100% of partners and employees have completed the Annual Compliance Certification (ACC).

Basis of preparation description

PwC Ireland has a robust anti-corruption programme and does not tolerate any form of bribery or corruption. This is clearly stated in PwC's **Code of Conduct**, in our policies and procedures, in all required training on anti-corruption and in regular messaging and communication by our leadership. PwC globally have a **Third Party Code of Conduct**, which prohibits any form of bribery or corruption. We have implemented robust Client and Engagement Acceptance initiatives and approval processes.

All partners and staff complete the Annual Compliance Certification (ACC), whereby they must certify that they have read, understand and will comply with all internal policies and guidance related to anti-corruption. All of our partners and people are required to complete mandatory annual Ethics and Compliance training. This training includes modules on ethics & business conduct, antimoney laundering, anti-trust/fair competition, anti-corruption, information protection, economic sanctions and insider trading. PwC Ireland has a policy setting out restrictions around gifts, favours and hospitality to or from audit clients.

Finally, PwC's Code of Conduct is based on the PwC Purpose and a core set of shared values and sets out a common framework around how we are expected to behave and to do the right thing. As part of our Speak up culture, partners and staff are encouraged to raise any questions or concerns about bribery or corruption.

Overview of PwC Ethics Helpline and Ethics Team

PwC Ireland has implemented the Global PwC Ethics Helpline and Case Management System. The Ethics Helpline is available for all PwC partners and staff as well as clients, third parties and any other external party; reporters can remain anonymous when using the helpline. PwC Ireland supports and drives a Speak up culture, encouraging all partners and people to ask questions or report any issues or concerns about ethical behaviour or organisational integrity.

In addition to the helpline, PwC Ireland has many other reporting channels, including resources in the Ethics team, Human Resources, the Office of the General Counsel, Risk Management, managers, coaches and business unit leaders. We reinforce and communicate those channels through internal communications, training, policies, and dedicated Ethics intranet sites.

Ethical matters, from all reporting channels, are considered by PwC Ireland's Ethics team, which is led by the Firm's Business Conduct Leader, who is also the Firm's Chief Risk Officer and a member of the PwC Ireland territory leadership team. The Ethics team, which meet regularly to confidentially review reported cases and trends; works with key stakeholders and firm leadership to address these issues and develop proactive strategies to promote and maintain an ethical culture. We have established Ethics Champions in our business units to further support the ethics function in promoting an ethical culture.

Risks and Opportunity Oversight

WEF Metric

Integrating risk and opportunity into business process

Company risk factor and opportunity disclosures that clearly identify the principal materials risks and opportunities facing the company specifically (as opposed to generic sector risks), the company appetite in respect of these risks, how these risks have moved over time and the response to those changes. These opportunities and risks should integrate material economic, environmental, and social issues, including climate changes and data stewardship.
